RISK FACTORS AND OTHER INFORMATION

I. GENERAL RISK WARNING

The price of securities as a result of market conditions fluctuates, and any individual security may experience upward or downward movement, and may even become valueless. There is a risk that losses may be incurred rather than profit made as a result of buying and selling of securities.

Past performance is not a guide to future performance.

An investor deals in a range of investments of which may carry a different level of risk. There is an extra risk of losing money when securities are bought from smaller companies. There may be a big difference between the buying price and the selling price of these securities.

II. PRUDENCE REQUIRED

This risk disclosure does not purport to disclose all the risks and other significant aspects of investing in these securities. An investor should undertake his or her own research and study on the trading of securities before commencing any trading activity. He/she may request information on the securities and issuer thereof from the Commission which are available to the public.

III. PROFESSIONAL ADVICE

The investor should seek professional advice if he or she is uncertain of, or has not understood any aspect of the securities to invest in or the nature of risks involved in trading of securities especially the high-risk securities.

RISK FACTORS

Potential investors should read thoroughly all information contained in this Prospectus and/or other Fund related documents available before making any investment decisions. He or she should carefully consider all investment risks, fees, and/or other factors detailed in these documents to make certain whether the Fund's nature is appropriate for his or her investment profile and objective.

Various risk factors can affect the market value of the assets of the Fund and cause the Fund's net asset value to vary. Consequently, the returns of the Fund are not guaranteed and there is a risk that a Fund might not achieve its investment objectives.

The major risk factors facing the Fund are listed by order of importance below:

MARKET RISK is the risk of change in the value/price of financial instruments from fluctuation in foreign exchange rates (currency risk), market interest rates (interest rate risk) and market prices (price risk). The Fund's investments may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries, or companies within those markets. Historically, the markets have moved in cycles and the value of the Fund's securities and other financial instruments may move drastically up or down from day to day. The risk can be minimized by following the exposure limits set in this prospectus or by the Commission. To mitigate interest rate risk when invested in bonds, the Fund Manager can shift maturities. The Fund Manager also manages volatility by taking a long-term and systematic approach.

LIQUIDITY RISK (also called funding risk) is the risk that the Fund will encounter difficulty in raising funds within a reasonable time to meet short term financial demands. The Fund may not be able to generate enough cash to pay for the redemptions within the normal 7-day period. The Fund Manager can also avoid this risk by keeping at least 10% of the portfolio in highly liquid securities as stipulated in the IRR of the Investment Company Act.

The Fund's liquidity contingency plan involves the daily review of cash positions of funds by the Investment Team as provided by the Fund Operations procedures and is overseen by FAMI Investment Committee. Moreover, the Fund's investments are highly tradeable and may be sold at the exchange at market price.

CREDIT RISK (also called default risk) is the risk that the issuer of the security will be unable to make the required payments on their debt obligations. The Fund invests in government securities, the risk of default of which is considered minimal. The Fund manages credit risks by transacting with accredited counterparties only. Credit exposures are closely monitored to ensure that payments are made on time.

OPERATIONAL RISK is the risk of loss resulting from inadequate internal processes, people, systems, or external events. The Fund ensures that policies and guidelines are in place to monitor and manage operational risks including maker-checker structures, regular reconciliation of positions, and regular monitoring reports. The risk management process further includes daily monitoring of compliance with ICA Rule 6 of the Implementing Rules and Regulations of the Investment Company Act.

REGULATORY RISK is subject to government regulation, which are subject to change from time to time. Regulations such as taxation and accounting rules may have a significant impact in the performance of the Fund which may either be positive or negative for the shareholders of the Fund. The risk management process further includes daily monitoring of compliance with ICA Rule 6 of the Implementing Rules and Regulations of the Investment Company Act. In addition, the Fund will be an active member of the Philippine Investment Fund Association (PIFA) through which it may recommend changes in regulatory policies that affect the mutual fund industry.

The overall risk management framework establishes risk management policies, procedures, limits and practices. The Fund's risk management framework is designed to manage risks that could affect the Fund value, contribute to sustainable returns and provide transparency through risk reporting. The Fund takes risks with the appropriate returns in order to meet its investment objectives. This is aligned with the Fund's vision and strategies embedded within its practices. In pursuing the investment objectives, it is ensured that all significant risks are identified, measured, managed and monitored. The Fund's investment outlets undergo evaluation in accordance with the Investment Policy, and internal and regulatory limits are monitored on a regular basis.

Monitoring and management of risk exposures are performed by the Chief Risk Officer, FMIC Risk Management Division, on a daily basis, check compliance with the investment limits prescribed under Rule 6.8 of the Implementing Rules and Regulations of the Investment Company Act, including compliance with internal investment policy limits, such as but not limited to approved portfolio allocation and sectorial allocation limits. Any breach noted by the risk officer, whether or not the same would involve regulatory limits or internal limits, is escalated to the Investment and Research Division for corrective action. The daily risk monitoring reports of the risk officer is collated weekly and reported to our Senior Management Committee during its weekly meeting. Thereafter, the risk monitoring and management report including the limit breaches noted thereof is elevated to the Audit Committee and taken up during its meeting held every other month of the year. As a matter of good governance policy, the Audit Committee renders its report to the Board of Directors.

The risk officer and his team also perform monitoring and management of operational risk incidents. Under existing policy, all units and departments are required to submit to the risk officer a risk incident report within 24 hours, if any. These units and departments are also required to fill up a templated Key Risk Indicator (KRI) report regardless of whether the pre-determined risk indicators were triggered or not. Similarly, these operational risk reports are escalated to the Audit Committee. Please note that the risk officer reports to the Board thru the Audit Committee.

The following are additional risks present in managing the Fund:

- Investment companies/mutual funds are neither insured with the Philippine Deposit Insurance Corporation (PDIC) nor any other agency of the government, nor guaranteed by the Fund Manager. Investors are advised to read the prospectus of the Fund before deciding to invest.
- Investors are exposed to the risk of dilution since other investors may subscribe to any amount of shares of the Fund. The influence that the investors can exert over the control and management of the Fund decreases proportionately.

The above risk factors are by no means all-inclusive. New and/or unidentified risks may arise any time given the dynamic financial markets and economic environment.

CORPORATE GOVERNANCE

All of the directors and officers of the Fund have attended seminars on corporate governance given by a SEC-accredited provider. The Board reviews and updates its Manual on Corporate Governance ("Manual") at least annually to ensure that it is kept abreast of global leading practices and principles on good corporate governance. At least annually, the directors accomplish a Board Effectiveness Questionnaire to determine their level of compliance, as well as top management's. There have been no deviations from the manual. The Board recently amended the Corporate Governance manual to incorporate provisions requiring the annual performance evaluation of the BOD members and the executive management. The Fund have adopted self-rating sheets which are being accomplished by the directors and senior officers. Charters of all board-level committees were also updated to incorporate this corporate governance scorecard.

The Board of Directors created the Related Party Transactions Committee (RPTCOM) to address possible conflict of interest situations in its dealings with related parties. All related party transactions (RPTs) regardless of amount must be approved by the RPTCOM of the Board. Before elevating to the RPTCOM for approval, any proposed RPT is coursed thru the Compliance Officer who reviews the proposed transaction as to whether it is arms-length basis and the terms of the transaction or relationship are no less favorable to the company. Thereafter, RPTCOM submits the approved RPT for Board confirmation and the Compliance Officer monitors the implementation of the approved RPT.

The RPT policy also requires all directors and senior officers with the rank of VP and up to disclose to the company if they and their immediate family members have transactions with the company. Upon the election of the directors or appointment/promotion of senior officers with the rank of VP & up, and at the beginning of the year, the Compliance Officer would request them to fill up an Information Statement Questionnaire (ISQ). The Compliance Officers reviews the ISQs and reports the results thereof to the Board.

EFFECT OF EXISTING OR PROBABLE GOVERNMENTAL REGULATIONS ON THE BUSINESS

Senate and congressional bills amending R.A. 2629, which is the main law that regulates the mutual fund industry, have been filed. The most prominent of these are the bills on the proposed Collective Investment Schemes Law (“CISL”). One of the provisions of the CISL bill is the exemption of the mutual fund companies from certain requirements of the Corporation Code as regards increasing ACS.

Furthermore, in relation to CISL bill, the ICA-IRR 3.4(j) states that an Investment Company shall not be required to comply with the minimum subscribed and paid-up capital relative to the increase in its authorized capital stock. This regulation will lower the cost paid by the Fund for the application to increase its authorized capital stock and can positively affect the business profitability. If passed into law, this would be of possible benefit to the mutual fund companies which, with their numerous stockholders, find it difficult to obtain at least 2/3 votes of eligible stockholders to approve certain corporate actions. The Fund expects the regulatory environment to improve with the passage of the CISL bill with benefits to the investors.

TAXATION

Investors are advised to consult their own professional advisers as to the tax implications of subscribing for, purchasing, holding, and redeeming shares of the Fund. Tax related laws, rules and regulations are factors that are subject to rapid change and which could affect the performance of the Fund.

Gains realized by investors upon redemption of their shares in a mutual fund shall not be included in gross income and shall be exempt from taxation as stated in Sec. 32 (B) (7) (h) of R.A. No. 8424 or National Internal Revenue Code (NIRC) as amended.

Dividends received from a domestic corporation by individual investors who are citizens and residents of the Philippines are subject to withholding tax of 10%. Dividends received from a domestic corporation by domestic corporations are not subject to income tax.

A documentary stamp tax (DST) is imposed on every original issuance of stock certificates at the rate of P2.00 for every P200 (or a fraction thereof) of par value. The said DST is paid by the Fund.

Income derived from doing business in the Philippines, net of allowable deductions, is subject to tax at the rate of twenty-five percent (25%) effective July 1, 2020 as amended by the Comprehensive Recovery and Tax Incentives for Enterprises (CREATE) Act (Republic Act 11534).
